

# Using An External Antenna With A Garmin GPS Receiver

Using an external antenna with a Garmin GPS receiver provides many benefits that include:

- The antenna will have the clearest possible view of the sky, vegetation and terrain notwithstanding.
- Your hands can be free for other tasks.
- The receiver can be clipped to a belt or pack strap for easy access.

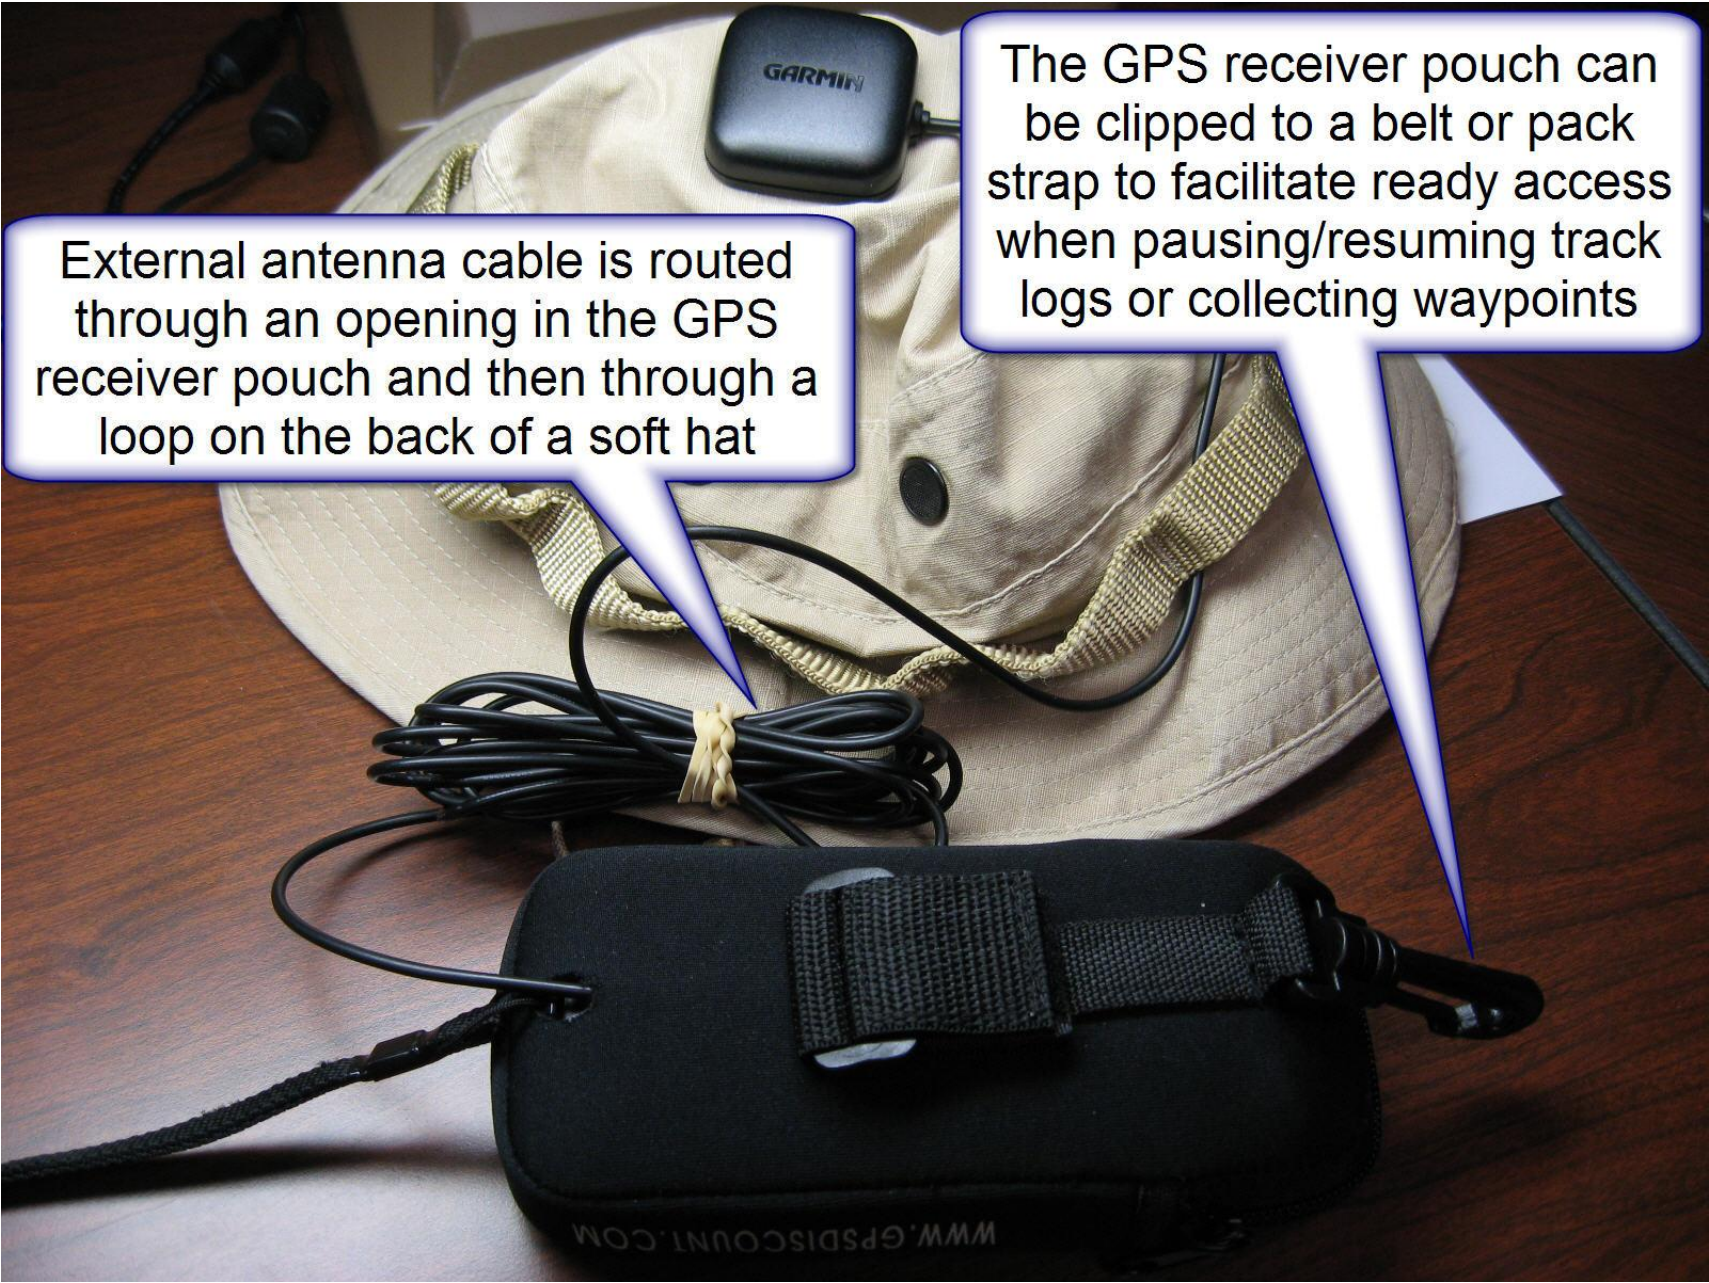

External antenna  
connection

Rubber band to  
secure external  
antenna cable

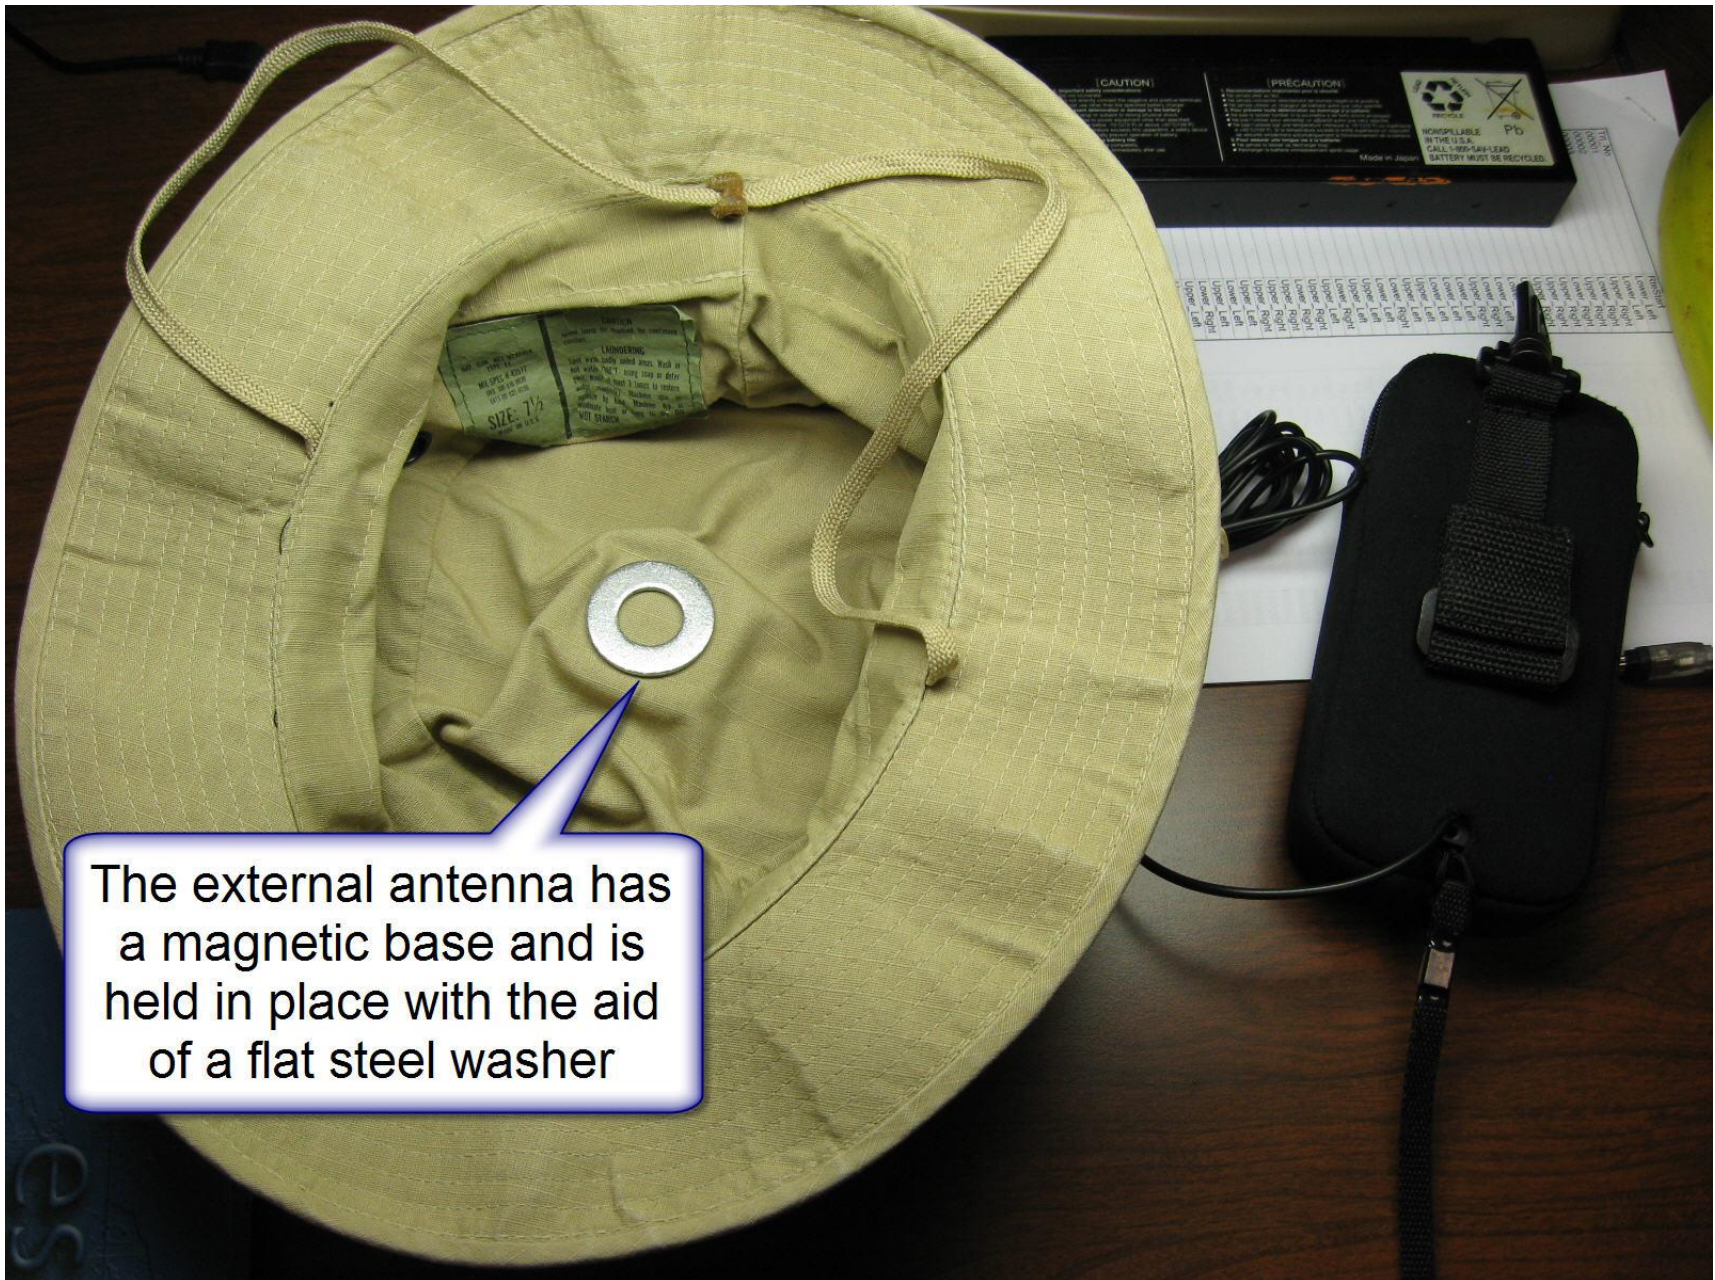

The GPS receiver pouch can be clipped to a belt or pack strap to facilitate ready access when pausing/resuming track logs or collecting waypoints

External antenna cable is routed through an opening in the GPS receiver pouch and then through a loop on the back of a soft hat

The external antenna has a magnetic base and is held in place with the aid of a flat steel washer
